APPENDIX

Healthcare rules for the containment of COVID infection

(as dictated by the Directorate of Health and Hygiene of the Governorate of Vatican City State)

1) Obligatory use of masks

Masks serve to reduce the risk that the wearer may infect others, as they stop a good part of the tiny droplets emitted from the mouth and nose when we cough, sneeze, talk. The use of the mask therefore helps to limit the spread of the virus, but it must be adopted in addition to hand washing and respiratory hygiene measures (sneezing and coughing in the crook of the elbow). Even with the mask, the safety distance (over 1 metre) must be maintained.

How to use the mask:

- Before putting on the mask, wash your hands with soap and water or with a hydro-alcoholic solution;
- Cover your mouth and nose with the mask, ensuring that it fits closely to the face;
- Avoid touching the inner part of the mask while putting it on;
- If the mask becomes damp, it is advisable to substitute it with a new one and not to re-use it; indeed, masks are single-use only;
- The mask should be removed by the elastic loops, without touching the front; it must be disposed of immediately in the undifferentiated waste;

Surgical masks should in any case not be used for more than one day.

Obligatory use of masks also in open spaces, in any case continuing to maintain the safety distance of more than 1 metre.

2) Frequent hand washing

Washing and disinfection of the hands are decisive to prevent infection. They must be washed with soap and water for at least 20 seconds. If soap and water are not available, it is possible to use a hydro-alcoholic disinfectant gel.

Disinfectant gel dispensers will be available inside the Museums.

3) Avoid touching the eyes, nose and mouth with hands

The virus is mainly transmitted through the respiratory tract, but it can also enter the body through the eyes, nose and mouth. Therefore, avoid touching your face with unwashed hands. If your hands come into contact with surfaces contaminated by the virus, they can cause infection.

“Coronavirus” Emergency Modalities, procedures and rules for visits to the Vatican Museums and Gardens

4) Avoid close contact with other people

Maintain an interpersonal distance from other people of over 1 metre.

5) Use of elevators

The use of elevators will normally be reserved for people with mobility difficulties or particular health conditions that make it advisable.

Normally it will be permitted only to ascend by elevator, other than in particular conditions that would imply use also for descent.

Access to the elevator cabin will normally be possible for just one person at a time.

Disabled visitors may enter elevators with a companion.

6) Avoid sharing bottles and glasses
